**SPRAYWAY EXPANDS AUTOMOTIVE DETAILING AND MAINTENANCE LINE WITH BIO-ENZYMATIC CARPET & UPHOLSTERY CLEANER**

Addison, Ill., Oct. 6, 2014 – Sprayway Inc., a leading specialty chemical solution provider and aerosol manufacturer, announced the addition of Bio-Enzymatic Carpet & Upholstery Cleaner to it’s growing line of vehicle detailing and maintenance products.

Sprayway Bio-Enzymatic Carpet & Upholstery Cleaner (SW-589) is a high-quality, professional grade cleaner with fast-acting enzymes that safely remove stubborn stains and odor-causing organic matter from carpet and upholstery. With an easy-to-use inverted spray actuator and powerful foaming action, this cleaner attacks spots, stains and odors with ease and speed. The custom-blended, bio-enzymatic formula suspends and dissolves embedded foreign matter and breaks down organic residue to eliminate stains and odors. Works effectively on spots caused by dirt, coffee, milk, wine, soda and pet stains.

Maker of “The World’s Best Glass Cleaner,” Sprayway is widely popular among auto detailing enthusiasts and maintenance professionals. Sprayway offers a complete line of vehicle care products, including brake parts cleaner, undercoating, degreasers and lubricants, as well as appearance products such as detail wax, tire shine, Blast-Out odor eliminators and air fresheners.

**About Sprayway**

Established in 1947 and headquartered in Addison, Illinois, Sprayway manufactures complete lines of aerosolized products for various industries, including automotive, furniture and upholstery, glass trade, sewing trade, housekeeping, industrial, MRO, screen printing and graphic arts. An industry leader in experience, expertise and innovation, Sprayway is part of the PLZ Aeroscience family of companies - the largest custom aerosol packaging and manufacturing group in North America. From adhesives and air care to lubricants and solvents, Sprayway provides a wide-range of products to the industries that need and rely on them.
