

PRODUCT TECHNICAL DATA SHEET

SW655 Winterizing Wax

DESCRIPTION: A special blend of silicone and wax that provides a slick, non-stick, flexible coating that prevents ice and snow from sticking to plows, shovels and other snow removal equipment. Treated surfaces also become water and rust resistant. The coating provides superior release action to reduce drag and sticking of many materials to metal and other surfaces.

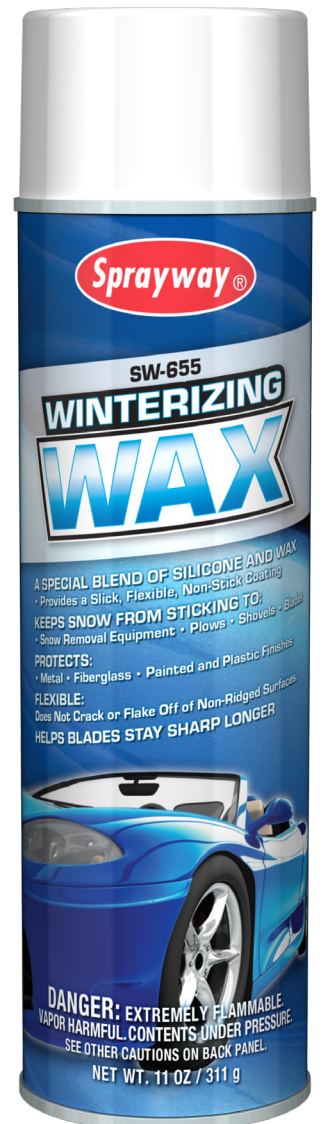

USES: Spray on snow removal equipment to keep snow and ice from building up on blades, mold boards and wings. Also excellent for use on road signs to keep snow or ice from sticking and allow for easy readability. Helps increase the efficiency of snow removal, material handling, turf maintenance and road equipment. In springtime, spray on blades and under decks of grass cutters and mowers to keep grass from sticking to blades and undercarriage.
